

PROJECT REPORT

PERSONAL EXPENSE TRACKER APPLICATION

PNT2022TMID43646:

Aswin S

Allen Joshy

Navaneeth Krishnan RV

Sarath A

1. INTRODUCTION

a. Project Overview

The Daily Expense Tracker System separates inputs into daily expense allocable amounts. If you go over that day's allocable amount, it deducts it from your income and gives you a new daily expense allocable amount; if that day's allocable amount is less, it adds it to your savings. At the end of the month, a report generating system for daily expenses will produce the income-expenditure curve. You can use it to add any savings you have set aside for special occasions like birthdays and anniversaries.

b. Purpose

The "Expense Tracker" programme was created to help manage daily spending in a more effective and practical manner. utilising this programme. We can lessen the manual tracking of expenditures and daily expense calculations.

2. LITERATURE SURVEY

Existing problem

Using a manual accounting system may have a number of drawbacks. Any business' accounting process can be challenging. A computerised accounting system may not require you to comprehend the accounting process in the same way that a manual accounting system does. Depending on who is conducting the bookkeeping, this could be a benefit or a drawback. To ensure that accounting is done correctly, a skilled professional is frequently

required. By hand, it could take a while to sort through your financial records' intricacy. Report generation takes b. References

PERSONAL EXPENSE TRACKER APPLICATION

Literature Survey

S.NO	PAPER	AUTHOR	YEAR	METHOD AND ALGORITHM	ACCURACY
1	Spending Tracker: A Smart Approach to Track Daily Expense	Uday Pratap Singh, et al	2021	The waterfall model is used. This application will help its users to manage the cost of their daily expenditure. It will guide them and aware them of their daily expenses.	91.00%
2	Expense Manager Application	A Velmurugan, et al	2020	This paper's main aim to eliminate the use of sticky notes, spreadsheets and handling of large chunks of data is successful, the new experience is hassle-free and very handy. It uses the Core Data Model.	94.02%
3	Expense Tracker : A Smart Approach to Track Everyday Expense	Hrithik Gupta, et al	2020	This application will help its users to manage the cost of their daily expenditure. It will guide them and aware them about their daily expenses. Waterfall model is used for the project because all the requirements are clear as this project is not dealing with the clients and hence beforehand planning can be made about how to carry out each phase of development.	89.92%
4	Cloud based Expense Tracker	Asthha Wahal, et al	2018	The waterfall model is used. This application will help its users to overcome the wastage of money. It will guide them and aware them about their daily expenses	93.4%
5	Expense tracker mobile application.	Angad Manchanda	2012	Modern life offers a plethora of options of service and goods for the customers. As a result people's expenses have gone up dramatically. comparing to a decade ago and cost of living has been increasing day by day. thus it is essential to keep a check on the expenses in order to live a good life with a proper budget set up.	TECHNOLOGY: HTML, CSS & JAVASCRIPT CODE

3. IDEATION & PROPOSED SOLUTION

a. Empathy Map Canvas

DATE	23 OCTOBER 2022
TEAM ID	PNT2022TMD43646
PROJECT NAME	Project-PERSONAL EXPENSE TRACKER APPLICATION
MAXIMUM MARKS	4 MARKS

The Empathy Map Canvas is a tool for understanding user needs and pain points. It is divided into four quadrants around a central user icon:

- What do they SEE?** (Top Left): Focuses on visual elements. Includes: "AN EASY AND SIMPLE WAY OF ACCESSING INTO THE APPLICATION.", "APPLICATION PROVIDES BETTER OFFERS THAT CAN IMPACT USER POSITIVELY", and "BETTER AVAILABILITY FOR THE USERS".
- What do they SAY?** (Top Right): Focuses on verbal communication. Includes: "DAILY EXPENSE DETAILS.", "OFFERS THROUGH NOTIFICATIONS AND ALERT MESSAGE SERVICE.", and "MONITORING EXPENSES".
- What do they HEAR?** (Bottom Left): Focuses on auditory information. Includes: "THEY HELP IN SAVING MONEY, SUCH AS UNNECESSARY EXPENSES", "MONEY CAN BE SAVED..PEOPLE ARE GETTING CHEATED?", and "PERSONAL INFORMATION MAY GET STOLEN.".
- What do they DO?** (Bottom Right): Focuses on actions. Includes: "BETTER WAY OF COMMUNICATION", "ATTITUDE", and "INFLUENCING THE PUBLIC".

What do they THINK and FEEL? (Center): Focuses on thoughts and emotions. Includes: "I WANT TO SAVE MONEY AVOIDING UNWANTED EXPENSE.", "IS IT SAFE TO INVEST/ SHARE MY DETAILS HERE IN THIS APPLICATION?", "I WANT BETTER OFFERS ACCORDING TO MY CONDITIONS OR DATA.", "WILL THE APPLICATION BE ABLE TO CURE MY PROBLEM.", "PAINS: Fears, frustrations, and anxieties", and "GAINS: Needs, hopes, and dreams".

PAINS (Bottom Left): Fears, frustrations, and anxieties. Includes: "COMPLEX IN TRACKING WHEN MORE EXPENSES ARE MADE.", "FEAR OF INTRUDERS", and "NOT ALL THE TRANSACTIONS CAN BE MONITORED".

GAINS (Bottom Right): Needs, hopes, and dreams. Includes: "CAN MAINTAIN THE EXPENSE COMPARING THE PREVIOUS STAT", "CAN SAVE MONEY", and "FROM THESE THE SPENDING MONEY LIMIT CAN BE IDENTIFIED".

b. Brainstorm and Ideation

Brainstorm & idea prioritization

Use this template in your next brainstorming sessions to your team. Get all ideas, their registration and start sharing concepts even if you're not doing in the same space.

- Brainstorm
- Share to audience
- Manage comments

Before you collaborate

Individual or cross-functional groups bring any and all ideas. There's no need to wait for the perfect idea. Share what you think is the best.

- Brainstorm
- Share to audience
- Manage comments

Define your problem statement

Write a clear and concise statement that defines the problem you are trying to solve. This will be the focus of your brainstorm.

- Brainstorm
- Share to audience
- Manage comments

Brainstorm

Write down all ideas that come to mind. No idea is too small. The goal is to generate as many ideas as possible.

Aswin S

- Financial goals and support
- Get savings goal

Allen Joshy

- Get savings goal
- Get savings goal

Sarah A

- Get savings goal
- Get savings goal

Navaneeth Krishnan

- Get savings goal
- Get savings goal

Group ideas

Write down all ideas that come to mind. No idea is too small. The goal is to generate as many ideas as possible.

Prioritize

Write down all ideas that come to mind. No idea is too small. The goal is to generate as many ideas as possible.

c. Define Problem Statement

Ideation Phase	
Define the Problem Statements	
Date	25 october 2022
Team ID	PNT2022TMID43646
Project Name	Personal Expense Tracker Application
Maximum Marks	2 Marks

Customer Problem Statement:

I am

a person with zero knowledge in finance

I'm trying to

track and categorize my personal expense with less effort

But

I'm not good at finance and end up in fail

Because

I couldn't always remember how I spent

Which makes me feel

Insecure in my savings for future

I am

a traveler who travels around the world

I'm trying to

manage how I spend my money on travelling

But

Every country has its own money and it's difficult to calculate my expenses in my country money (Rs)

Because

It's difficult to calculate my expenses in my country money (Rs)

Which makes me feel

frustrated

d. Proposed solution

PROJECT: PERSONAL EXPENSE TRACKER APPLICATION

PROJECT DESIGN PHASE-1

Team ID: PNT2022TMID43646

Define CS, fit into CC	<p>1.CUSTOMER SEGMENT</p> <ul style="list-style-type: none"> Customers those who spend money unwontedly and to track their expenses. Customer those who can't remember their expense. Those who expecting to track their expense via statistics. 	<p>6.CUSTOMER CONSTRAINTS</p> <ul style="list-style-type: none"> Customer should use UPI or Net-Banking to track the expense. If the money is spend through cash customer must add the expense in the application. 	<p>5.AVAILABLE SOLUTIONS</p> <ul style="list-style-type: none"> SPENDEE Application available both android and the ios. 	Explore AS, differentiate
Focus on J&P, tap into BE, understand RC	<p>2. JOBS-TO-BE-DONE/PROBLEMS</p> <ul style="list-style-type: none"> The main Intention of the application is to track the expense and provide statistics of expenses It provides statistics based on categories of expenses. To include money spend through cash,bank cheque's etc. 	<p>9.PROBLEM ROUTE CAUSE</p> <ul style="list-style-type: none"> The Main problem is gathering the data from the UPI apps or Nat-Banking application. This will act as the main problem of the application. Laziness of the customer to add the expense done through cash in the application. 	<p>7.BEHAVIOUR</p> <ul style="list-style-type: none"> Customer should responsibly add the expenses done through off-line mode. To assure the data safety to the user. 	Focus on J&P, tap into BE, understand RC
Identify strong TR & EM	<p>3.TRIGGERS</p> <ul style="list-style-type: none"> Customer may think , they spend more money and no saving. <p>4.EMOTIONS: BEFORE / AFTER</p> <ul style="list-style-type: none"> BEFORE: No Savings. AFTER: Few saving due to expense tracking application 	<p>10.YOUR SOLUTION</p> <ul style="list-style-type: none"> Design a cloud based web Application of the expense tracker. Provide statistic of the expense done by the user through the graphs or charts. Providing email alerts if the total expense exceed the limit. 	<p>8.CHANNELS OF BEHAVIOUR</p> <ul style="list-style-type: none"> In Online mode user don't have more work user need to set the maximum expense limit. In Off-line mode user should responsibly add the expenses done through cash 	Identify strong TR & EM

4. REQUIREMENT ANALYSIS

a. Functional requirement and Non functional requirements

Project Design Phase-II Solution Requirements (Functional & Non-functional)

Date	31 October 2022
Team ID	PNT2022TMID43646
Project Name	Project - Personal Expense Tracker Application
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User Data	Data gathered in the application server is saved in the high security cloud server.
FR-4	Alert Notification	Alert messages through the Email or SMS.
FR-5	User Monthly Budget Plan	Setting Monthly budget to manage their expenses.
FR-6	Cloud Data Storage	To save the user valuable data high security cloud storage are used (AWS, IBM, GOOGLE, etc)

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Effectiveness, efficiency, and overall experience of the user interacting with our application should be maximised.
NFR-2	Security	Authentication, authorization, encryption of the data must be done in the application.
NFR-3	Reliability	Probability of error in the operations in a specified environment for a specified time should be minimised.
NFR-4	Performance	How the application is functioning accurately and effectively the application is to the end-users.
NFR-5	Availability	Using Cloud Storage and database, application reliability and the user satisfaction will affect the solution

b. Customer Journey Map

Document an existing experience

5. PROJECT DESIGN

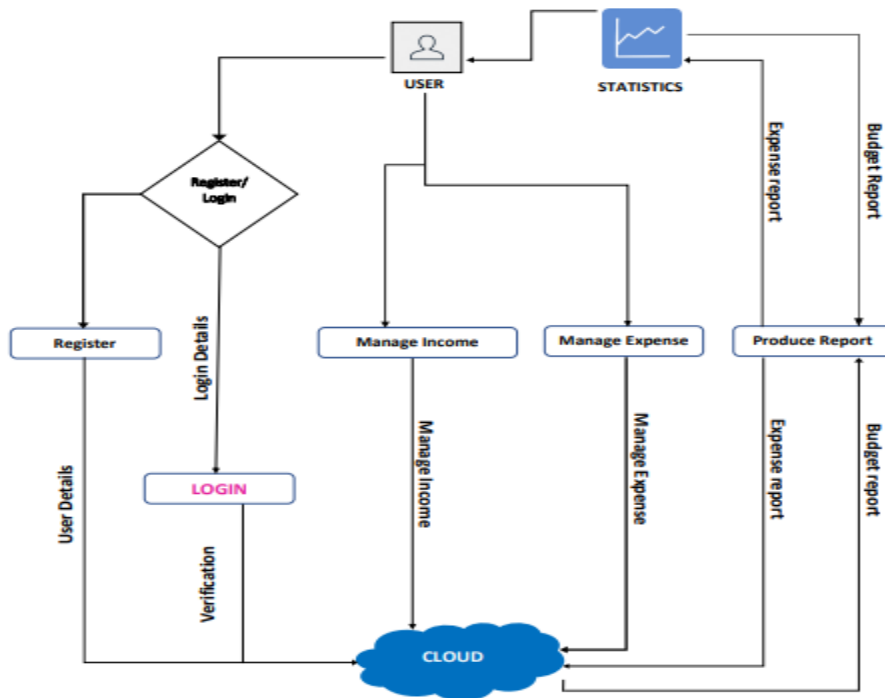

a. Data Flow Diagram

Project Design Phase-II
Personal Expense Tracker Application
Data Flow Diagram & User Stories

Date	10 November 2022
Team ID	PNT2022TMD43646
Project Name	Project-Personal Expense Tracker Application
Maximum Marks	4 marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

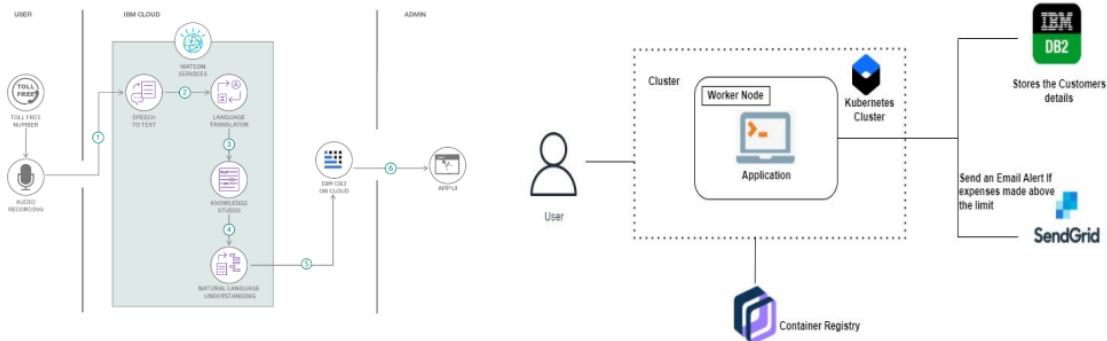

6. SOLUTION AND TECHNICAL ARCHITECTURE.

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	31 October 2022
Team ID	PNT2022TMID43646
Project Name	Project - Personal Expense Tracker Application
Maximum Marks	4 Marks

Technical Architecture:

7. USER STORIES

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Mobile user	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account /dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
	Login	USN-2	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail		Medium	Sprint-1
		USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
Web user	Dashboard		As a user, I can access my detail, manage the expense, add budget, expense report from the app etc...		High	Sprint-1
	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account /dashboard	High	Sprint-1
	Login	USN-2	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard	USN-3	As a user, I can access my detail, manage the expense, add budget, expense report from the app etc...		High	Sprint-1
Customer Care Executive	Email or Customer Care no		As a user, I can contact the service administration for the support.	I can solve the Issue.	High	Sprint-3
Administrator	Email or Customer Care no		As a user, I can contact the service administration for the support.	I can solve the Issue.	High	Sprint-1

9.PROJECT PLANNING PHASE.

a. Milestone and Tasks

Project Planning Phase
Project-Personal Expense Tracker Application
Milestone and Activity List

Date	26 October 2022
Team ID	PNT2022TMID43646
Project Name	Personal Expense tracker Application

TITLE	DESCRIPTION	DATE
Literature Survey & Information Gathering	Literature survey on the selected project & gathering information by referring the, technical papers, research publications etc.	23 OCTOBER 2022
Prepare Empathy Map	Prepare Empathy Map Canvas to capture the user Pains & Gains, Prepare list of problem statements	24 OCTOBER 2022
Ideation	List the by organizing the brainstorming session and prioritize the top 3 ideas based on the feasibility & importance.	25 OCTOBER 2022
Proposed Solution	Prepare the proposed solution document, which includes the novelty, feasibility of idea, business model, social impact, scalability of solution, etc.	31 OCTOBER 2022

Problem Statement	Prepare problem - statement document.	31 OCTOBER 2022
Solution Architecture	Prepare solution architecture document.	25 OCTOBER 2022
Customer Journey	Prepare the customer journey maps to understand the user interactions & experiences with the application (entry to exit).	10 NOVEMBER 2022
Solution Requirement	Prepare the solution requirement document.	31 OCTOBER 2022
Technology Stack Architecture	Prepare the technology stack architecture diagram.	31 OCTOBER 2022
Data Flow Diagrams	Draw the data flow diagrams and submit for review.	10 NOVEMBER 2022
Prepare Milestone & Activity List	Prepare the milestones & activity list of the project.	10 NOVEMBER 2022
Project Development - Delivery of Sprint-1, 2, 3 & 4	Develop & submit the developed code by testing it.	12 NOVEMBER 2022

9. CODING & SOLUTIONING

a. Feature 1

We have added the data visualization methods for expenditure. The pie chart has been used to represent the monthly expenses. The pie chart is a pictorial representation of data that makes it possible to visualize the relationships between the parts and the whole of a variable. For example, it is possible to understand the industry count or percentage of a variable level from the division by areas or sectors. The recommended use for pie charts is two-dimensional, as three-dimensional use can be confusing

b. Feature 2

Email notifications will be sent to the users once they cross the expenditure limit through send grid mail system. Most notifications are transactional, meaning a recipient's action or account activity triggers them. But some notifications are marketing related, encouraging the recipient to take a specific action. Ecommerce product notifications inform recipients about new products or discounts. Plus, unlike general marketing emails, these are highly personalized and focus on a single product. For example, if a customer views an item on your website and that item goes on sale, you can send the customer a notification to let them know this is the best time to buy. Users can also opt into receiving notifications when an out-ofstock item is back in stock. Notification emails tend to perform well because the content is highly relevant to the recipient. But the only way for the recipient to know this is if you state the content clearly in the subject line.

10. TESTING

a. Test Cases

				Date	29 November 2022								
				Team ID	PM72022TMD26257								
				Project Name	Personal Expense Tracker Application								
Test Case ID	Feature Type	Component	Test Scenario	Pre-Req	Steps To Execute	Test Data	Expected Result	Actual Result	Status	Comment	TC for Atom	BUG ID	Executed By
LoginPage_TC_D01	Functional	Login Page	Verify user is able to see Login/Signup popup when user clicked on My account button	None	1. Go to website 2.Login page appears	Username: Prithvi password: qwerty	Login/Signup popup should display	Working as expected	Pass	-			Prithvi Krishna
LoginPage_TC_D02	UI	Login Page	Verify the UI elements in Login/Signup	None	1. Go to website 2. Enter details and click login	Username: Prithvi password: qwerty	Application should show below elements: a. username text box b. password text box c. Login button d. New customer? register	Working as expected	Pass	-			Vikram
LoginPage_TC_D03	Functional	Login page	Verify user is able to log into application with Valid credentials	Username & password	1. Go to website 2. Enter details and click login	Username: Prithvi password: qwerty	User should navigate to user account homepage	Working as expected	Pass	-			Yashwanth
LoginPage_TC_D04	Functional	Login page	Verify user is able to log into application with Invalid credentials.	Username & password	1. Go to website 2. Enter details and click login	Username: Prithvi password: 123456	Application should show "Incorrect username or password" validation message.	Working as expected	Pass	-			Chandra Mouli
LoginPage_TC_D04	Functional	Login page	Verify user is able to log into application with Invalid credentials.	Login first	1. Go to website 2. Enter details and click login	Username: Prithvi password: qwerty	Application should show "Incorrect username or password" validation message.	Working as expected	Pass	-			Prithvi & Yashwanth
LoginPage_TC_D05	Functional	Login page	Verify user is able to log into application with Invalid credentials.	Login first	1. Go to website 2. Enter details and click login	Username: Prithvi password: qwerty	Application should show "Incorrect username or password" validation message.	Working as expected	Pass	-			Chandra Mouli
Add Expense Page	Functional	Add Expense page	Verify whether user is able to add expense or not	Have some expense to add	1. Add date, expense name and other details. 2. Check if the expense gets added	add expense = \$50	Application adds expenses	Working as expected	Pass	-			Vikram

b. User Acceptance Testing

Acceptance Testing

UAT Execution & Report Submission

Date	20 november 2022
Team ID	PNT2022TMID43646
Project Name	Project – Personal Expense Tracker Application

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Personal Expense Tracker Application project at the time of the release to User AcceptanceTesting (UAT).

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	6	0	2	4	12
Duplicate	1	0	0	0	1
External	2	0	0	1	3
Fixed	11	2	2	10	25
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	5	2	1	8
Totals	20	7	6	16	49

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Section	Total Cases	Not Tested	Fail	Pass
Print Engine	7	0	0	7
Client Application	15	0	0	15
Security	2	0	0	2

Outsource Shipping	0	0	0	6
Exception Reporting	3	0	0	3
Final Report Output	5	0	0	5
Version Control	1	0	0	1

11. RESULTS

a. Performance Metrics

Tracking income and expenses: Monitoring the income and tracking all expenditures (through bank accounts, mobile wallets, and credit & debit cards).

12. ADVANTAGES & DISADVANTAGES

*Advantages

It is easy to set up and use. It keeps track of everything for you in real time using an automatic app. It has a wealth of information, so any data you believe is crucial to track is there and at your disposal; you only need to look to see it. Everything has a simple user interface as well. There is a tab or an option

available for you whether you want to create a budget, keep track of a specific sort of spending, or review your financial history .It happens instantly. Your data will be tracked for you by the application. In contrast to what you might manually perform, it doesn't do it once a week or once a month.

***Disadvantage**

Your data is likely being exploited and sold, and it is less secure. If the product is a free service, then you are the product. Like other financial apps, Mint.com offers its services for nothing. No matter what their privacy policy may or may not say, just expect that someone, somewhere is going to record and analyse your spending patterns because they need to pay their expenses. Now, you shouldn't have to worry about identity theft or credit card fraud since these firms are big enough and safe enough to prevent those things from happening.

13. CONCLUSION

You can save money by keeping track of your daily costs, but it can also help you set future financial goals. If possible, look for areas where you may cut costs and negotiate better terms if you know exactly where your money is going. The Expense Tracker project will help us keep track of our everyday spending and make a record of it. Compared to other income and expense trackers, the project we designed is more effective. The project successfully avoids manual calculation by attempting to avoid determining the salary and expense each month. It's an intuitive application.

14. FUTURE SCOPE

1. It will have a variety of record-keeping choices (such as food, travel expenses, salary, etc.).
2. It will continue to give updates about our daily spending automatically.
3. Despite being in a haste to make money in today's hectic and expensive world, we eventually gave up. As we naively waste money on unnecessary items and titles. We so came over with the intention of following our profit.
- 4) The user can specify their own expense categories here, such as those for food, clothing, rent, and bills, where they must input the money that has been spent and may also add additional information to denote the expense.
